ARMY DATA AND ANALYTICS PLATFORMS

INNOVATIVE DATA OPERATIONS FOR THE ARMY

WHAT IS ARDAP?

ARDAP is a portfolio of systems that will modernize Army business processes and enable scalable, agile and trusted data platforms integrated with data services/applications, visualization and analytic tools to facilitate fact-based and resource-informed decision-making.

WHAT DOES ARDAP DO?

- Collects, catalogs, integrates, analyzes and visualizes data from disparate source systems to support data sharing across the Army, as well as Joint partners.
- Ensures that data is Visible, Accessible, Understandable, Linked, Trusted, Interoperable, Secure (VAULTIS).
- Provides data to enable warfighter mission accomplishment in a multi-domain environment.
- Develops, integrates, tests, delivers, operates and maintains an enterprise capability for the Army training and education communities

WHO WE ARE

- A portfolio of programs designed to support Soldier readiness by using data systems and software that deliver quality at speed.
- A nesting place of integrated data that allows Soldiers, civilians and decision-makers to make faster and more accurate data-driven decisions at the point of need.
- A project office dedicated to delivering rapid capability that is valuable, scalable and sustainable.

MISSION

To provide data that enables **warfighter mission accomplishment**

FAST FACTS

Provides data and analytics to nearly **20** customer and stakeholder organizations

Supports more than **2 million** Soldier, civilian and contractor users

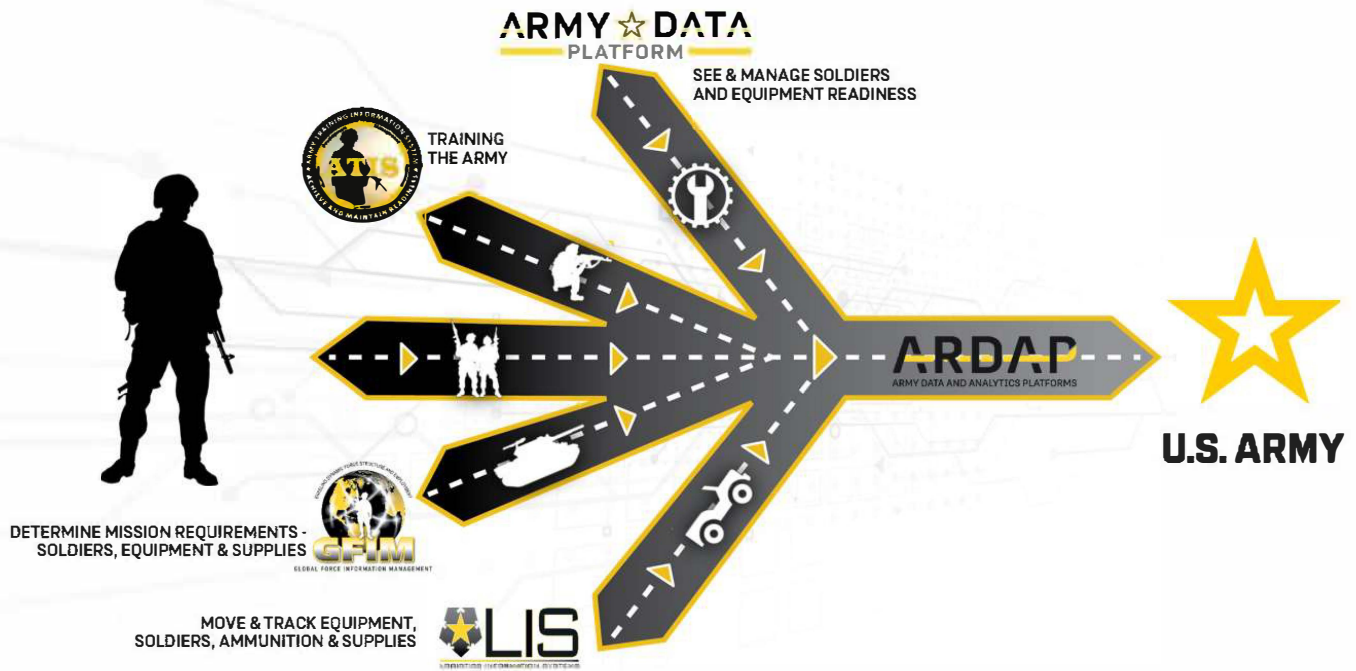

Supports key tenets of the Army's **DATA STRATEGY** to innovate data operations and increase agility

ARDAP STARTS WITH DATA....

...AND ENDS WITH WARFIGHTER MISSION ACCOMPLISHMENT

ARDAP PRODUCT OFFICES

The Army's data-driven operations and decision-making platform, enabling Army users at every level and across classifications to view comprehensive Army-wide data, analyze trends and make data-driven decisions.

Product Manager Army Training Information System will develop, integrate, test, deliver, operate and maintain an enterprise capability for the Army training and education communities.

A cloud-based, transactional suite of applications leverages best-of-breed technology to support commanders at all levels—from tactical to strategic. It enables them to plan, program and produce authoritative Global Force Management (GFM) data, which is crucial for the Army's Deploy to Redeploy and Retrograde (D2RR) business processes.

Responsible for acquisition program management of assigned logistics information systems and providing post-deployment capability support of automated military/civil transportation visibility and tactical ammunition supply & property management solutions.
