FOREIGN MILITARY SALES – ARMY CASE EXECUTION SYSTEM

FMS-ACES is going places!

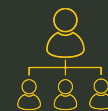

MISSION

Deploy an integrated solution that meets the needs for foreign military sales case execution through innovative capabilities, automated interfaces, and enhanced reporting and data analytics to support the Army's readiness.

FAST FACTS

Subsumes capabilities of a 50-year-old legacy system and consolidates two disparate systems into a single source of Army FMS data.

Exchange information with 26 distinct financial and logistics systems of record partners for end-to-end process execution.

WHAT IS FMS-ACES?

FMS-ACES is the first program Defense Business System (DBS) in the DoDI 5000.87 Software Acquisition Pathway, within PEO Enterprise, located in the Defense Integrated Business Systems (DIBS) portfolio.

WHAT DOES FMS-ACES DO?

FMS-ACES is a cloud-based Platform as a Service (PaaS) providing a user-centric journey design that will modernize the Army's FMS case execution and management processes from end to end. By stream-lining business processes, data standardization, integrated through state-of-the-art interface management, FMS-ACES will provide accurate case management and business analytics enabling real-time, accurate and informed data-driven decisions for Senior Leaders.

TOP GOALS & PRIORITIES

- Be the Army's authoritative source for FMS data providing trusted, timely, and secure data to support the FMS business processes
- Provide modern, customizable, intuitive user interface to improve overall end-user experience
- Utilize Defense Security Cooperation Agency (DSCA) standardized data structures of financial, acquisition and logistics case execution information to provide visibility across the Army Enterprise
- Consolidate disparate systems into a single source to improve access, reduce redundancy, and establish FMS data transparency

BY THE NUMBERS

Support 2000 users, incorporating 6,200 active FMS cases and 88,000 active requisitions.

"FMS-ACES will ensure visible and accurate efficiency for the Security Cooperation Enterprise."
Kelly Rutherford, Product Lead, FMS-ACES
